

Collection Of Museum Of Natural History

Specimen: 0000016/Horned Toad Lizard
Desert Horned Lizard

E:\ACCUMULATUS\Photos\0000016a.jpg

Status: In Collection-Exhibit

Phrynosoma platyrhinos

Phylum: Chordata
Class: Reptilia
Order: Squamata
Family: Phrynosomatidae
Genus: Phrynosoma
Species: platyrhinos

Catalog: Herpetology

Gender: Male

Weight (gr): 13.900

Age: Adult

Length (mm): 125.000

Type: Taxidermy

Catalog ID: 1947.005.01

Source: Collected

Date Acquired: 06/13/1947

Location: Cabine 7a:Shelf 5:Section 3-C

Collected Info:

Country: * United States

Address: Post Office 197

City: RIO VERDE

State: AZ **Zip:** 85263

County: MARICOPA

Location: small park

Latitude: 33°43'18.04"N

Date Collected: 06/13/1947 **Time Collected:** 08:15:00

Longitude: 111°39'48.88"W

Collected By: Percy, Archibald

Elevation (m): 768.3

Preparation Info:

By: Percy, Archibald

Date: 07/24/1947

Number: 1947.07A

Tissue Sample? Yes No

Identification Info:

By: Percy, Archibald

Date: 07/25/1947

Note:

The Desert Horned lizard (*Phrynosoma platyrhinos*) is a horned lizard native to western North America. They typically range in size from 3 - 5in (7.6 - 13.6 cm). They are commonly referred to as horny toads or horned toads, although they are not toads.
